### USAGE TIPS

#### DETECTING THE AR MARKER

After selecting an object,  
ARneo is in camera mode

**AIM** the marker during 1 s.  
at the distance of 50 cm  
then the object appears !

#### THE MARKER IS GEOLOCATED

Display another object  
without a new detection

#### MOVE BACK at a distance > 3 m

The marker position is stored  
then you can removing it !

**FIND** more informations on [www.arneo.vision](http://www.arneo.vision)

I discover now ARneo for free  
on the App Store - iPhone & iPad

I wish to use ARneo

to display objects of my choice  
in full size in my environment

I subscribe to an offer

**PREMIUM - PRO - INFINITE**  
on [www.arneo.vision](http://www.arneo.vision)

I upload all my photos

through my personal space  
linked to my user account

I start my application

then I log in with my  
username and password

I place the AR marker

where I want to view an object  
on a wall or simply laid

I choose the object image

in the albums of my catalog  
refreshed when I open the app

I aim the AR marker

to display this first object  
in Augmented Reality !

I can use ARneo freely

my catalog of images is loaded  
no need of Internet networks !
